

TRIP SUMMARY (QUANTICO, VA)

05/26-30/2003

1.0 DATE AND TIME.

May 26-30, 2003

2.0 LOCATION.

Dumfries, VA.

3.0 ATTENDEES.

- K. Carruthers
- D. Litalien
- J. Konicki
- K. Cruley
- Cathy Clements
- Mike Myers

4.0 ADMINISTRATIVE NOTES.

None.

5.0 SCOPE OR PURPOSE.

None stated.

6.0 AGENDA.

See below.

7.0 DISCUSSION.

7.1 Tuesday, 27 May 2003.

Kurdt had the preliminary objectives and a draft outline prepared. The group present discussed the flow and content of the briefing and set to work. Kurdt advised the group that the JAVS telecon scheduled for 28 May 2003 had been cancelled in lieu of the briefing work session.

7.2 Wednesday, 28 May 2003.

0800-1500: Coalescent traveled to Dumfries, VA, to meet with the working team (Carruthers, Litalien, Cruley, Konicki) to continue preparation of the briefing draft. Mid-morning, the group contacted Mr. Bryce to ensure the message being crafted was in alignment with his vision. We agreed to meet in the late afternoon to review the initial package and receive feedback.

1500-1830: The team met at Quantico to review the brief. Mr. Bryce became available at 1700. After paging through the briefing, he advised a few minor changes. He requested we return on Friday, 30 May, at 0830 to finalize the package.

7.3 Thursday, 29 May 2003.

0830-1630: Coalescent met with Litalien/Carruthers at Sverdrup to ensure the General Reeves briefing was in order. Following the briefing work session, discussion ensued regarding the implementation planning for JAVS, the USMC transactional system, and AIT installation. Litalien identified that there was an implementation planning meeting next week (2-6 June 2003; New Orleans, LA) and that it would be valuable for Coalescent to participate. Carruthers approved the travel. Plans were made to attend.

During the afternoon, the complexities of implementation were discussed. Critical tasks and their interdependencies gave rise to valuable discussion on the goals of each project and their objectives. Coalescent is tasked to create the initial project plan documents for Government review/concurrence/approval.

Discussions began regarding project planning for the JAVS and EAM projects. Some initial operating definitions and terminologies were discussed resulting in some clarification and ground ruling. It was determined by the team that two types of NBCD gear exist today and must be tracked in the supply chain.

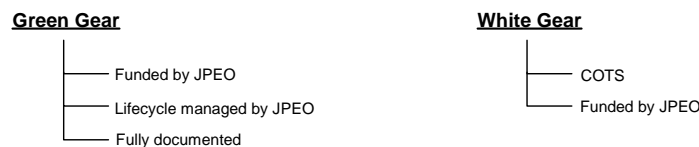

Figure 1. Two Gear Types

Further discussions resulted in the formulation of phased approach to reach operational TAV for the Marine Corps.

Figure 2. Phased Approach to Reach TAV

7.4 Friday, 30 May 2003.

0730-1200: The team met again with Mr. Bryce to review final package. Mr. Bryce asked for embellishment regarding the GCSS vision and the Marine Corps' intention to be in alignment.

1200: Adjourn to airport.

8.0 ACTION ITEMS.

None stated.

9.0 FUTURE PLANS.
